

# UTILITY SALES TAX CREDIT INFORMATION

---

## IMPORTANT! CLAIM YOUR CREDIT ON UTILITY SALES TAXES

The Utilities Sales Tax Credit allows you to deduct from your taxable sales a portion of your utility costs (electricity, gas; propane, etc.) for the manufacturing and processing of food. This tax credit was obtained for you by the CRA after extensive negotiations with the Colorado Department of Revenue. All cities, counties and districts whose sales taxes are collected by the Department of Revenue can be included in this calculation. >>*Be sure to use and claim this benefit!*

### Utility Sales Tax Instructions

In order to take the Utility Sales Tax Credit, a restaurant must complete the DR-1465 form. On the form there are two methods for determining what your sales tax credit will be.

- Method 1 or 2 - Either method can be used if sales of processed food exceed 25% of your total business sales for the year noted on the DR-1465.
- Method 2 must be used if sales of processed food does not exceed 25% of your total business sales for the year noted on the DR-1465.

Once you have determined which method should be used by the business, or which one is best for the business (if sales of processed food exceed 25% of your total business sales), complete the DR-1465. The Colorado Department of Revenue has approved this form for use in claiming your tax credit. It should be filed with your February Sales Tax return, if you file a monthly return. If you file quarterly, file your tax credit claim in April. If you file seasonally, submit it with the last return of the season. If you didn't take it on the recommended return, you can still take it on a later return. Additionally, the tax credit can be used retroactively for up to three years.

Once completing the DR-1465, take the amount from step 3 and transfer it to the appropriate line on the DR-100 form (3b Exemptions). If you are filing your sales tax return by paper, attach a copy of the completed DR-1465 to your DR-100. If you are filing your sales tax return electronically, send a copy of the completed DR-1465 to:

Colorado Department of Revenue  
Denver, CO 80261-0013

### Note the following additional instructions:

Ownership Changes - In the case of change of ownership, if you did not pay bills, you cannot take the credit. If you paid half, you can take half the credit. If you no longer own or lease the location on which you paid utilities last year, you can still use the credit on your present foodservice location taxes. We recommend that you send copies of the bills from your other location to verify that you paid them and to assist the Revenue Department in processing your claim.

Commissaries - If you are preparing all food in a commissary and distributing it to where it is sold, you should already have an exemption as a food processing facility. We recommend that you take steps immediately to set up the proper exemption and file for a refund on that basis.

For more information contact Nick Hoover at [nhoover@corestaurant.org](mailto:nhoover@corestaurant.org) or 303-830-2972.

## Retail Food Established Computation Worksheet for Sales Tax Deduction For Gas and/or Electricity

### Instructions

Follow the directions in the DR 1465 to determine which calculation method applies to your business. Enter the deduction calculated on line 3. of method 1 or method 2 on the DR 0100 Colorado Retail Sales Tax Return Deductions and Exemptions Schedule, Part A, line 7. If filing by paper, attach a copy of the DR 1465 to your DR 0100. If filing electronically, send a copy of the completed DR 1465 to the address in the upper right hand corner of the form and the form will be attached to your account.

**Special Note:** Due to legislative changes, the state portion of this deduction will not be allowed from 03/01/2010 to 06/30/2012. Please see our web site at [www.TaxColorado.com](http://www.TaxColorado.com) for more information. You may still apply for a refund for the months of January and February 2010 by sending a DR 0137 Claim for Refund form to the address on the form. All forms can be found on the web site noted above.

Either method **1** or **2** may be used if sales of processed food exceed 25% of your total business sales. Method **2** *must* be used if sales of processed food do not exceed 25% of your total business sales.

Sales Tax Account Number	Year (YYYY)
--------------------------	-------------

**Method 1:**

1. Monthly cost of gas and electricity used for restaurant operation minus sales tax:

January \$	May \$	September \$
